

NEW CAS PROGRESS TRACKING

PAGE	REF	WORKS TO BE COMPLETED	NOTE
CAS			
Main	1.1	Remove folder background image.	
	1.2	Increase heading text-size to 13px. 	
	1.3	Increase heading letter-spacing to 0.9px. 	
	1.4	Decrease the font-weight of package heading from 700 to 600. Ensure you import the semi-bold 600 open sans from Google fonts. 	
	1.5	Change the heading background-color to rgb (184, 201, 254).	
	1.6	Change the heading text color to rgb (0, 33, 99).	
	1.7	The border color should be set to white, with the bottom-border being slightly thicker.  UPDATE: Works fine in IE11, but in Chrome when scrolling the bottom border returns to a thin line again. Still not done!	Done
	1.8	Change the package heading background-color to rgb (83, 141, 213). 	
	1.9	Change the package heading font color to white. 	
	1.10	Change the cell background colour, to switch between rgb (232, 237, 255) & rgb (197, 217, 241) 	
	1.12	Change the cell texts colors to rgb (102, 102, 153)	

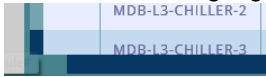

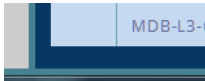

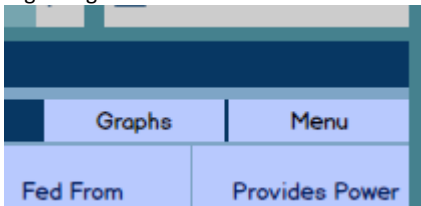

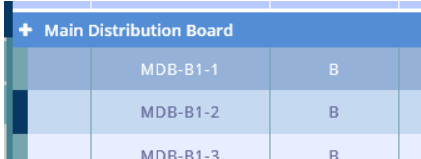

NEW CAS PROGRESS TRACKING

			
	1.13	<p>A hover should be set for the rows with the text color being white, and the background-color being rgb (149, 177, 215)</p> 	
	1.14	It needs to be attempted that information in cells is editable, by just double click the cell. A single click should select the whole role, for tasks such as move and deleting rows.	
	1.15	On completion of 1.15 it needs to be attempted that multiple cells can be selected, by single click multiple cells for mass deletion, or multiple changing of one cell, such as floor level.	
	1.16	<p>Side bar hide function needs to be working. Also if possible use a higher quality icon, the one in use appears grainy.</p> 	
	1.17	<p>Make the top navigation have a larger border between each option, change the letter spacing to 0.9, and change the font weight to normal.</p> 	
	1.18	<p>Spelling mistake on the main CMS Nav; should be Programmes</p> 	
	1.19	<p>Centre arrow in the main nav left section.</p>  <p>UPDATE: Now both arrows have totally disappeared in IE11?</p> 	
	1.20	<p>Get file tree edit function working; the required functions:</p> <ul style="list-style-type: none">Remove CASAdd CAS (From default list)Change OrderChanage Name	Working
	1.21	Add column search and filter functions	
	1.22	Add single & all CAS search	
	1.23	Graph & Summary mock-ups still to be completed.	Graph added

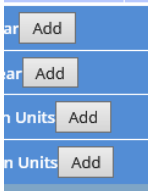

NEW CAS PROGRESS TRACKING

	1.24	Print options for all CAS	Added for 1 CAS
	1.25	Add all CAS Sheets.	Working
	1.26	Apply hover effect to the Package Heading with a background-color of #cccccc with a text color of rgb(0,33,99)	
	1.27	Change cell font-size to 12px	
	1.28	Filters are option hidden items, which should only appear when selected.	
	1.29	In addition to the current row hover color change, make a hover that will display the Engineers Reference, give it a 1.5sec delay.	
	1.30	<p>Zoom options: Currently is too difficult to see which items you are viewing when scrolling over to the right-hand side of the CAS Sheet. If possible, can you look into having different zoom options, zooming-out using the browsers zoom function, make text fairly blurry. Around 65% zoom out should be enough, with options say for 70% and 90%?</p> 	
	1.31	<p>Icon Disappear: In IE11 many of the icons have disappeared?</p> 	
	1.32	<p>Vertical Centre: Few nav buttons have lost their vertical centre in IE11.</p> 	
	1.33	<p>Column Collapse: Most of the columns are full on information not needed by most of our engineers, and often make it difficult to see the information they are looking for. If possible double clicking on a column should collapse it into a slightly thick line that once double clicked again will reappear.</p>	
	1.34	<p>Integrate T&C Documentation: T&C Documentation will fall into the CAS Sheet section, with the choice of either uploading a PDF, or multiple PDF's for one item, or for the item to use the Test Sheets module that was being developed in the old Techniques.</p> <p>For now concentrate on the PDF upload options, one the Electrical > Low Voltage bar, have a button that says 'Test Sheets' and the view will change to shorted CAS Version like in the current Techniques, with the last</p>	

NEW CAS PROGRESS TRACKING

		column used for uploads. If multiple columns are selected the items will receive the same PDF upload, this will be useful for the Fire Damper CAS, as many of the items will have the same test sheet.	
	1.35	Should be Commissioning Plan not Program. 	
	1.36	Scroll bars are not aligning with CAS Sheet in IE11:  Chrome: 	In IE there is top and bottom arrow in scrollbar. But Chrome doesn't have. In IE we can't remove the arrow space. Let me try some script
	1.37	In an items comments section, it possibility of linking documents need to be reviewed. For example if I typed @SO-001, this should create a pop-up link to that particular Site Observation.	
	1.38	Where to put the Graphs, and the print, import and export options. Menu will be a drop down containing, Print, Export, and Import. The export and import are regarding excel. 	Done
	1.39	Package heading needs to freeze upon scrolling down, instead of having to scroll all the way back up to close it again. 	
	1.40	Icon hover, make a light blue? 	Done
	1.41	Ensure the sequential numbering is always 3 digits and automatic.	
	1.42	Summary is in the process of being designed, mock-up will be given soon.	
	1.43	The add item function as explained was a line to be added underneath, which the cells could clicked and edited. Not as pop-up box as current! The floor level should be auto-suggest if possible?	
	1.44	Add button not appearing properly in IE11	

NEW CAS PROGRESS TRACKING

			Changed to new button
	1.45	<p>Colors are off in the add icons or incorrect in Chrome & Firefox</p> 	
	1.46	<p>Even in the box popup for new items the exit icon often doesn't work, nor is neatly aligned.</p> 	
	1.47	Carry out adding item testing on multiple browsers, multiple times, and ensure there are no problems.
